Overview

Healthcare risk management is one of the most needed and yet neglected in majority of healthcare institutions. The current pandemic has highlighted the need for strategic approach to understand and implement Healthcare Risk Management.

Complexity of potential risks in healthcare organizations require a logical framework for identifying, evaluating and responding to risks. A survey conducted on 150 health workers and administrators revealed an overwhelming number of respondents (88%) opined that enterprise-level risk management is more of a priority today than it was years ago.

It is in this background CAHO has developed a self-paced online Healthcare Risk Management course.

LEARNING Objectives

- (i) To provide a self-paced online course covering the key aspects of risk management.
- (ii) To improve the proficiency and competency of healthcare professionals in this field.
