

Diagnostic International Webinar Series (BY CAHO DIAGNOSTIC CENTRES)

Commencing from 30th June 2024
(last Sunday of every month)

7:30 PM - 9:30 PM IST

Register @ bit.ly/Diagnosticwebinarseries

ABOUT THE WEBINAR SERIES:

CAHO Diagnostic in partnership with IPC Alliance BD, is proud to present a comprehensive webinar series focused on ISO 15189:2022, the international standard for medical laboratories. This free, monthly series is designed to provide valuable insights and updates for professionals in the medical diagnostics field.

HIGHLIGHTS:

- **In-Depth Sessions:** Detailed exploration of ISO 15189:2022 standards and their applications.
- **Expert Speakers:** Learn from leading experts in medical diagnostics and quality management.
- **Interactive Discussions:** Engage in Q&A sessions to clarify your queries and enhance your understanding.
- **Practical Insights:** Gain practical knowledge to implement ISO standards effectively in your laboratory.

WHY ATTEND?

- **Stay Current:** Keep up-to-date with international standards in medical laboratory practices.
- **Enhance Quality:** Learn how to improve the quality and efficiency of your laboratory services.
- **Network:** Connect with peers and experts from the medical diagnostics community

AGENDA

| Date | Time | Session |
|------------|-----------------------|---|
| 30-06-2024 | 7:30 PM - 9:30 PM IST | Mastering ISO 15189: Essentials for Lab Accreditation Dive into ISO 15189, understanding its significance and the key regulatory bodies involved. Explore the importance of laboratory accreditation, get acquainted with a glossary of crucial terms, and gain a comprehensive overview of the Total Testing Process. |
| 28-07-2024 | 7:30 PM - 9:30 PM IST | Demystifying ISO 15189: Key Clauses, Terms, and Definitions Gain a thorough understanding of ISO 15189 by exploring its key clauses and terminology. This session includes interactive exercises to reinforce your knowledge of the terms and definitions critical to mastering the standard. |
| 25-08-2024 | 7:30 PM - 9:30 PM IST | Understanding ISO 15189: Structural, Governance, and Resource Requirements Explore the structural and governance requirements of ISO 15189, along with the necessary resource requirements. Engage in practical exercises designed to deepen your understanding and application of these essential aspects for laboratory accreditation. |
| 29-09-2024 | 7:30 PM - 9:30 PM IST | Optimizing the Pre-examination Process Delve into strategies for enhancing the efficiency and effectiveness of the pre-examination process in laboratory settings. Participate in interactive exercises aimed at refining your approach to this critical phase of testing and analysis. |
| 27-10-2024 | 7:30 PM - 9:30 PM IST | Examination Techniques: Method Verification and Validation Explore the crucial processes of verifying and validating examination methods. Engage in practical exercises designed to strengthen your skills in ensuring accuracy and reliability in laboratory testing procedures. |
| 24-11-2024 | 7:30 PM - 9:30 PM IST | Precision in Practice: Uncertainty Measurement, Biological Reference Intervals, and Validating Examination Results Dive into the intricacies of uncertainty measurement, establishing biological reference intervals, clinical decision limits, and documenting examination procedures for ensuring the validity of results. Participate in exercises to enhance your proficiency in these critical aspects of laboratory operations. |
| 20-12-2024 | 7:30 PM - 9:30 PM IST | Post-Examination Management: Handling Complaints, Ensuring Continuity, and Emergency Preparedness" Learn effective strategies for managing the post-examination process, addressing complaints, maintaining continuity, and planning for emergencies. Engage in practical exercises to develop skills in handling these crucial aspects of laboratory operations. |
| 02-02-2025 | 7:30 PM - 9:30 PM IST | Data and Information Management: Ensuring Compliance and Risk Management" Discover best practices for managing and securing data to meet ISO 15189 standards effectively. This session also covers essential risk assessment and management strategies, providing practical insights and exercises to enhance your compliance and security protocols. |
| 23-03-2025 | 7:30 PM - 9:30 PM IST | Microbiology Insights: Addressing QC and Non-Conformity Challenges Explore critical Quality Control (QC) and Non-Conformity (NC) issues in the microbiology lab, gaining practical insights and solutions to enhance lab performance and compliance. |
