About Topic:

Communication is the cornerstone of a good HSE Professional. Failure to communicate their ideas and share the risks observed in a timely manner can result in injury, loss of life or serious damage to assets. This presentation shall assist HSE professionals in the following

1. Understanding the importance of good communication skills
2. How to assertively express your observations in a timely manner
3. How to get management support through effective communication
4. To evaluate what is important and urgent, versus routine communication
5. Tools needed to achieve greater heights as a Team Leader and reach greater heights
