TRANSFORM THE CARE CONTINUUM

by tapping intelligent devices

Home-Care Solutions

Remote Monitoring Solutions

24/7 Doctor On Call

Virtual-Care Solutions

Onboard the digital journey
with Microsoft Healthcare…

Government Mandate 1:

Every hospital that wants to exercise insurance based claims, needs to have at least a basic NABH Accreditation

Deadline: June 2018

Microsoft

Be a Future-Ready Healthcare Service Provider with NABH Certification

Microsoft ISV-IBHAR supports you to comply with the IRDA[1] mandate

Dear Customer,

Transform your delivery practices and processes so you can transform the lives of the people you serve. Put to practice processes supported with necessary infrastructure in a time bound manner, enhancing the quality in health systems while **meeting the NABH[2] standards**.

As per the new IRDA initiative, it is mandatory to embark on the quality certification journey. The Microsoft **ISV partner - IBHAR** rightly enables you to do that and comply with the NABH standards as their approach to improving operational excellence, prepares you well for the requisite accreditation with the following support;

Government Mandate 2:

Every hospital or healthcare organization should store all the patient data in a standardized and secure format from the day of the patient's first interaction with the hospital or healthcare organization to at least 3 years after his/her demise

Microsoft Azure

Store patient data **securely**

Meet **Electronic Health Records (EHR)** Standards with Azure

Did you know?

You could get SECURE unlimited cloud storage at just **INR 7,000 monthly*!**

With the upsurge of healthcare services around us, there is a 24/7 data generation nowadays that has a long-term clinical relevance. This enormous data plays critical role in enabling better healthcare for patients.

Ministry of Health and Family Welfare has recently revised EHR standards, mandating Healthcare organizations to store patient data 'securely'.

Be EHR compliant with Microsoft Azure

The trusted cloud solution offers both scalability and security enabling:

Information capture | Storage and retrieval | Data analytics

Say yes to better & connected healthcare with Azure

IBHAR Offering

Comprehensive content & tools that can be straight away implemented

Short training reorienting personnel towards adhering to best practices

Quick Implementation of signages, infrastructure, registers, forms and policies

Accurate monitoring of adherence to standards by Medical Heads & Quality Managers

Pre-defined review templates to review contextual information post implementation

CPQIH[3] to choose from over 125 CAHO (Consortium of Accredited Healthcare organizations) trained professionals to work with you

EHR Offering

*T&Cs apply; ~5TB storage at 7K INR/month, scale up options available for unlimited cloud storage

Microsoft

Thank You!
