| • Gastroenterology and Hepatology | • Psychiatric/Mental Health | • Internal Medicine   |

**ClinicalKey** Now

Be effective. Be fast. Be sure.

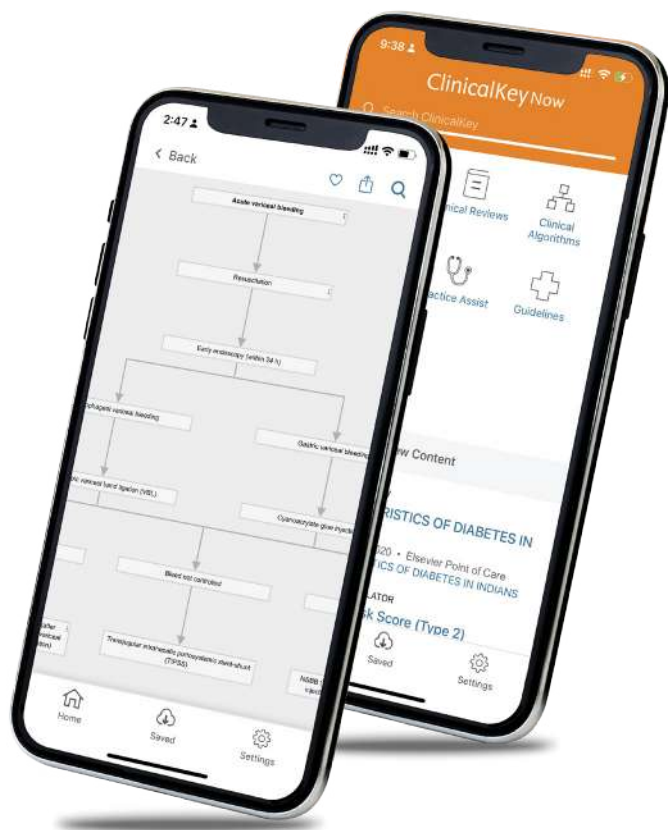

Physicians are under pressure due to ever-increasing workloads and the overwhelming explosion of new medical information.

Having the right information for the right decision easily to hand – whether diagnosing in trauma, defining treatment on the ward, or diagnosing and treating in parallel to manage a patient’s condition – can be challenging and time consuming.

### Convenient to access. Easy to use. Now

ClinicalKey Now is a mobile-first solution, also available on desktop, that supports your physicians at point of care by providing the information that matters, the moment it matters. It can be used in any scenario, even when offline.

### Concise information. Clear direction. Now

ClinicalKey Now’s ultra-concise answers and smart search save valuable time and help your physicians make informed decisions with evidence-based knowledge.

- **Quick views**  
Summarised practical steps on clinical work-up and management.
- **Clinical reviews with deep dive content**  
Comprehensive topic coverage to answer ‘why?’.
- **Clinical algorithms**  
Visual algorithms empowering targeted decision making.
- **Indian drug monographs**  
Thorough coverage of drug compositions and brands sold in India, plus approved combination therapies.
- **Practice assist**  
Complete support on techniques, procedures and care support.
- **Guidelines**  
Easy access to the locally relevant practice guidelines.
- **Medical calculators**  
Establish and check Clinical Scores and Indices with ease.

# ClinicalKey Now

Be effective. Be fast. Be sure.

Fast understanding. Uninterrupted workflow. Now.

ClinicalKey Now enables physicians to find the right information at the bedside or at the time of decision-making. It reduces interruptions to their workflow allowing more time to be spent with patients.

## Minimise your search

### Using other sources

Finding results is challenging without having sufficient knowledge at each stage of the search journey e.g. diagnostic evaluation. This can be:

- An onerous process
- Time consuming
- Open to error

## Get direct answers. Now.

### Using ClinicalKey Now

Decision trees clearly show every stage of the search journey from start to end, with algorithms providing concise answers. This means:

- A streamlined single process
- Quick and targeted results
- A visual map with clear direction
